

## ADHD Myth:

All Children Grow  
Out of ADHD

### A SUBSTANTIAL MINORITY OUTGROW ADHD

Approximately only 14%  
of cases are no longer  
symptomatic in  
adulthood

### ADHD FACT:

Children diagnosed  
with ADHD are not  
likely to grow out  
of it

### BY ADOLESCENCE

The vast majority of cases  
are still highly  
symptomatic and  
impaired (over 80%)

### 21-27 YEARS OLD

At this age, significant  
symptoms and  
impairment persist in 50-  
86% of cases diagnosed in  
childhood
